<p>Fuel Cost (estimated) for 12,000 miles A fuel cost figure indicates to the consumer a guide price for comparison purposes. This figure is calculated by using the combined drive cycle (town centre and motorway) and average fuel price. Re-calculated annually, the cost per litre as at Apr 2018 is as follows - petrol 121p, diesel 124p and LPG 62P.</p> <p>VED for 12 Months Vehicle excise duty (VED) or road tax varies according to the CO₂ emissions and fuel type of the vehicle.</p>		<p>£1284</p> <p>£120</p>																										
<p>*Important Note</p> <p>The fuel consumption figure shown is taken from the official test results obtained from this vehicle type when new. It is intended to provide a standard figure for comparing the relative fuel economy of different vehicles of a similar age and condition and does not represent the average fuel consumption that will be achieved on the road. A number of factors not included in the official new vehicle test will affect the fuel consumption achieved on the road including: vehicle age, how it has been maintained, road/weather conditions and driving style.</p>
